VisionMAX Your Business Vision

Enterprise Ordering Solutions

Smart beacons that know who has entered the store allow for a more personalized experience. Offer specials and favourites suited to them.

Maximize your revenue per sq/ft by increasing/enabling your pickup order system. Allow people to order quality food with ease.

Operating on our centralized system lets you manage all aspects of your business in one place – from anywhere. Create a more immersed experience in store. Tablet ordering and product selection reduces wait times and streamlines service.

VECOM - VISIONMAX ENTERPRISE CUSTOMER ORDER MANAGEMENT

About Visionmax

Visionmax was formed 18 years ago with a focus on simplifying technology for the retail sector in order to facilitate sales. Our products include POS systems, e-commerce, mobile/tablet access, supply chain management, digital sinage, and kiosks with full customization and integration services. We deliver our solutions on time, on budget with a 90% rehire rate.

Our retail products are running in both chains with hundreds of stores as well as in small retailers. We empower pharmacies, restaurants/fast food franchises, electronics retailers, convienience stores, grocery stores, and fashion retailers to expand and innovate their existing business model. For example, our solutions for one client increased their capacity from 40 million pizza orders to 50 million orders a year coupled with an annual cost savings of \$50 million. Another activates cell phones with our POS.

We are anchored by our \$12B partner SYNNEX for hardware distribution, call center, and onsite services. We are integrated to the largest credit card service providers, and a financing partner that will package everything for one low monthly price for our customers in the U.S. and Canada.
