Visionmax Retail

SMART Digital Signage

The VisionMAX Smart Digital Signage Management Software allows users to control the displays shown in hundreds or thousands of remote locations. No installation is required, as it operates in a web browser and can run in the Cloud.
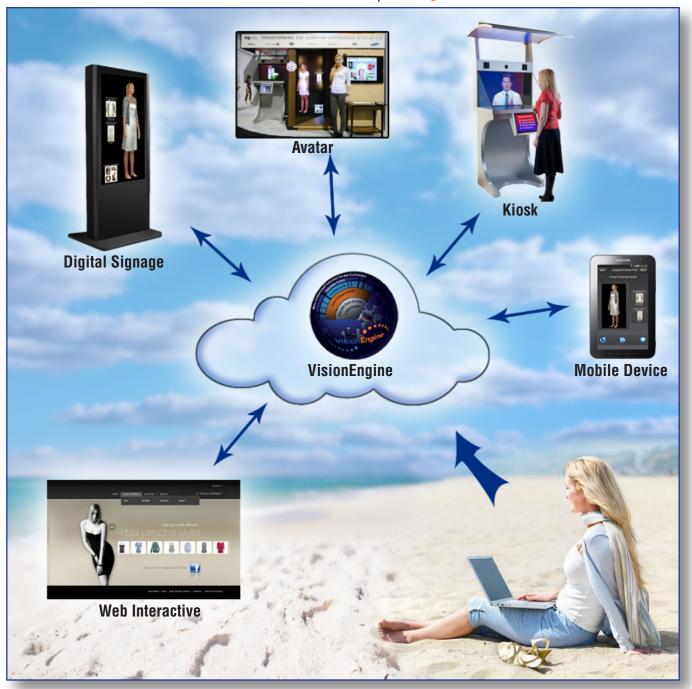

Software features include:

- Version and campaign management control allows planned versions to be created and then activated when ready.
- Content is easily managed centrally and/or by store.
- User-friendly templates simplify creating new displays.
- Simple drag and drop sequencing of content.
- Time-based triggering of content changes to maximize time-of-day impact.
- Allow customers to interact and control displays using personal device.

- Supports full 1080P HD content delivery.
- SaaS pricing model – a low monthly fee per screen with no up front license fees.
- VisionMAX Retail Omni-Channel is a proven platform, with installations performing up to 50 million transactions a year, helping companies transform their business operations offering a seamless, integrated customer shopping experience between the store and your online and mobile service channels.
